Portfolio: anu771063.github.io/portfolio

PROFESSIONAL SUMMARY

Frontend developer with 5 years of experience building and shipping React.js and WordPress products. Have delivered 80+ production projects across ecommerce, corporate, and enterprise platforms, and have a track record of turning slow, underperforming sites into fast, search-friendly ones through focused code optimization and clear technical decisions. Comfortable leading small cross-functional teams of 5 to 6 developers and designers. Turn Figma, Photoshop, Canva, and Adobe XD designs into accessible, cross-browser frontend code that matches the design closely. Strong with TypeScript, Python, component architecture, and modern build tooling. Have folded AI-assisted development (Claude, Claude Code) into my workflow, which has cut development cycles by around 60% without sacrificing code quality.

SKILLS

Frontend Architecture & Development: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS/SCSS, component-based architecture, responsive web design, cross-browser compatibility, performance optimization, accessibility (WCAG 2.1), REST API integration

Build Tools & Development Environment: Webpack, Vite, Parcel, build optimization, code splitting, tree shaking, asset optimization

SEO & Performance: On-page SEO, meta optimization, header tag structure, image alt optimization, Core Web Vitals optimization, site speed optimization, semantic HTML, schema markup, SEO-friendly URL structuring, Semrush, Screaming Frog, Google Search Console, Google Analytics, Lighthouse optimization, GTmetrix, PageSpeed Insights

WordPress & CMS: WordPress, Elementor, Divi, WPBakery, Avada, WooCommerce, Shopify, Squarespace, Wix, Go High Level (GHL), headless CMS architecture

Design Implementation: Figma to HTML/React/WordPress, Photoshop to HTML, Adobe XD to HTML, Canva, email template design and development, close, accurate design-to-code implementation

Backend & APIs: Node.js, PHP, Python, Laravel, RESTful API integration, authentication (OAuth, JWT, SSO)

Version Control & Collaboration: Git, GitHub, version control workflows, cross-functional collaboration, code review, team leadership

Collaboration & Development Tools: JIRA, ClickUp, Asana, Monday.com, Slack, Figma, Canva, Azure DevOps, project management, Agile methodologies

AI-Assisted Development: Claude, Claude Code, Claude Cowork, ChatGPT, Cursor, Anthropic Claude Course (completed)

PROFESSIONAL EXPERIENCE

Frontend & UI Developer

January 2023 - Present

Amartam Technology Solutions Pvt. Ltd., Mohali, Punjab, India

- Delivered 50+ responsive, production websites and web applications using React.js, TypeScript, JavaScript, WordPress, and Elementor, and set up reusable component libraries and design systems the team still uses.
- Raised Lighthouse performance scores from the 40-50 range into the 70-80s across enterprise client projects by refining code optimization strategies, image optimization, and page structure.
- Improved search visibility and Core Web Vitals across client portfolios through on-page SEO work, including meta optimization, semantic HTML, header hierarchy, alt text, and clean URL architecture, using Semrush and Screaming Frog to guide fixes.
- Launched e-commerce platforms on Shopify and WordPress with product management, cart optimization, and checkout flows, and developed reusable UI component libraries to keep multiple projects consistent.
- Drove funnel and automation results across 9-10 Go High Level (GHL) projects, designing responsive email templates and building marketing automation workflows and customer journey orchestrations.
- Led a team of 5-6 developers, designers, and product managers, mentoring team members and consistently hitting project deadlines.
- Cut UI design effort by around 80%, debugging time by 70-80%, and total development cycles by roughly 60% by folding AI-assisted development workflows (Claude, Claude Code, Claude Cowork) into daily work.
- Verified layouts and performance stayed reliable at launch through systematic cross-device and cross-browser testing.

Web Developer

August 2021 - January 2023

Appiesoft Web Solutions Pvt. Ltd., Chandigarh, India

- Shipped 20+ responsive websites using HTML5, CSS3, Bootstrap, JavaScript/jQuery, and modern frontend frameworks, following mobile-first design principles.
- Delivered full-featured e-commerce platforms with product catalogs, shopping cart systems, secure checkout flows, and payment gateway integrations.
- Turned designs from Figma, Photoshop, and Adobe XD into accurate, production-ready WordPress frontends with semantic HTML and accessibility standards.
- Customized WordPress installations using Elementor, Divi, WPBakery, and Avada with custom code.
- Coordinated closely with design and backend engineering teams to keep multiple concurrent projects on schedule, delivering consistent technical solutions and timelines.

SELECTED PROJECTS

80+ production websites and web applications delivered across enterprise, e-commerce, SaaS, and WordPress platforms. Recent highlights:

- GRITS (gritsportal.com): Enterprise job portal for the (re)insurance industry with advanced job search filters, employer and candidate account systems, application workflows, and REST API integrations.
- AI Foundry (aifoundry.me): Responsive landing platform for an AI upskilling program with React component-based architecture and Core Web Vitals optimization.
- Amartam (amartam.com): Multi-page corporate site showcasing services, case studies, and technical expertise with a performance-optimized frontend.
- Naylor (naylor.com): 100+ page WordPress site with Elementor, custom code, a mega menu system, and SEO optimization.
- Aumnitech (aumnitech.com): Technology solutions corporate site with responsive design and enterprise branding.
- The Board Twins (boardtwins.com): Fitness platform built on Go High Level with custom funnel-based landing pages, forms, and email template design.
- Maxicom (maxicom.us): Service-based WordPress site redesign spanning 40+ pages with performance optimization.
- Terracotta (terracottatcm.com): E-commerce platform built with Elementor Pro featuring custom checkout, shop pages, and cart optimization.
- Misch (misch.com): WordPress hybrid platform combining service offerings with e-commerce course delivery.
- Lama Furniture (lamafurniture.com.au): E-commerce site page development and ongoing maintenance on Wix with performance monitoring.

EDUCATION

- Master of Computer Applications (MCA), Chandigarh University, Mohali, Punjab (In Progress)
- Bachelor of Computer Applications (BCA), Baba Farid College, Bathinda, Punjab (2018 - 2021)
- Matriculation and Senior Secondary, Govt. Adarsh Sr. Sec. School, Bathinda, Punjab (2015 - 2018)
